Apportionment

This session discusses the major issues pertaining to apportionment. The management of a taxpayer's property, payroll and sales factors can give a taxpayer some discretion over their apportionment profile and, to some extent, which state(s) it will pay tax in. In some cases, state law may contain certain unique and beneficial rules for constructing the traditional apportionment formulas or permit favorable alternative apportionment. In other cases, "nowhere" factors can be created by having amounts in the denominator of a factor which are not included in any state numerators. These issues, as well as efforts by states to modify a taxpayer's factors--through throwout and throwback statutes, for example--will be discussed.

Learning Objectives

Units 1 and 2

- ▶ Understand the growing trend away from an evenly weighted three-factor formula
- ▶ Recognize unique rules for sourcing from services, intangibles, and capital assets
- ▶ Understand the difference between sourcing receipts costs of per-

- ▶ Recognize some of the gray areas in characterizing income for sales factor purposes
- ▶ Discuss the different methods used to value property for property factor purposes
- ▶ Understand the property factor treatment of rented property, property in transit, moveable property and leased property
- ▶ Understand what compensation is included in a state's payroll factor
- ▶ Discuss the concept of payroll attribution

- ▶ Define the "ultimate destination" rule
- ▶ Describe the "throwback rule" and when it applies
- ▶ Define the "Joyce" rule and when it applies
- ▶ Define the "Finnegan" rule and when it applies
- ▶ Describe the "double throwback rule" and when it applies
- ▶ Describe the "throwout rule" and when it applies
- ▶ Define a "dock sale" and its potential implication on sales factor apportionment

Unit 4

- ▶ Identify the major constitutional issues related to the apportionment of income, including the issues related to the Due Process Clause and Commerce Clause
